

Title: GASTRIC STIMULATION FOR ALTERED SENSORY PERCEPTION TO TREAT OBESITY  
Inventors: Starkebaum  
Docket No.: P-9902.00

## **GASTRIC STIMULATION FOR ALTERED PERCEPTION TO TREAT OBESITY**

### **ABSTRACT**

In general, an implantable medical device is disclosed for generating an electric stimulation signal to induce symptoms of gastroparesis without substantially reducing normal stomach motility. The induced symptoms of gastroparesis may reduce a patients desire to consume large portions of food and thus provide an effective treatment for obesity.
